POWERWISE SYSTEMS HARDWARE DIAGRAM SITESAGE LAYOUT 1.0

Electrical Panel

Gateway includes 5 VDC power supply.
Device can also be powered over ethernet.

NOTES:

- I. The gateway should be hard-wired to the router for reliability. A wireless connection to the network is also an option. A single gateway can communicate with multiple SiteSage devices (30 feet is the approximate range).
- II. SiteSage Energy Monitor is powered by a 15A breaker inside the panel.

LEGEND:

SiteSage Energy Monitor 7" x 1.875" x 2.5" (L x H x W)

SiteSage Gateway 5.25" x 1.5" x 3.25" (L x H x W)

SiteSage xPod - Up to 3 can be daisy chained to energy monitor to add more channels. Each xPod adds 10 channels. xPod not pictured in panel. 3.75" x 0.875" x 1.875" (L x H x W)
